When Berthe had told him of the drink given her by Marie, the doctor said: "You have escaped death by a hir's breatth. The girl made a mistake that would have been fatal had there been any delay in sending for me. She gave you belladonan." That usaally was the verdict whenever Marie scored a victim. It was assumed that the had made a mistake. It was impossible to believe that a girl with such a geatle, wistful face could have administered poisons deliberately.

could have administered poisons activerately.

For a time Marie dispensed her poisons as occasion offered, but she wanted larger opportunities, so she went into training as a nurse, and, although she did not failsh her course, she had into training as a nurse, and, atthough as he did not fusish her course, she had no trouble in securing employment in the desired capacity. Nature evidently had designed her for service in the sick room, she was so quiet, so gentle, so patient, her hands and volce were so soothole. She went to nurse Madame Chabloz, and promptly gave her poison, which brought her to the edge of the grave, but the madam was strong woman, and she rallied.

Madame Juvet of Genera conceived the idea of establishing a private hospital, and Marie applied for the position of head nurse

Our Family History,
Why does the ordinary family keep
so poor a record, not of it lowed olongs—
they are, for the most part, dulk
enough—but of its own personalities?
None of us can see in front of usmuch further than the probable lifetime of our own children, and we donot like to look even so far as that.
Surely it would give us a sense of
space if we could see clearly a little
further behind us.
Moreover, to those we are engaged
in the bringing up of their own childfren, a history of the family nighb

Three Hundred Million Bushel Crop in 1915

Farmers pay for their land with one year's crop

Regarding Western Canada as a grain producer, a prominent business man says: "Canada's, position today is sounder than ever. There is more wheat, more oats, more grain for feed, 20% more cattle than tast year and more hogs. The war market in Europe needs our surplus. As for the wheat crop, it is marvelous and a monument of strength or business condence to build upon, exceeding the mentoptimistic predictions."

. Wheat averaged in 1915 over 25 bushels per acre Oats averaged in 1915 over 20 busines per acre Parley averaged in 1915 over 45 busines per acre Parley averaged in 1915 over 40 busines per acre

prices are high, markets convenient, excellent land, low in price either im-groved or otherwise, ranging from \$12 to \$30 per acre. Free homestead lands are plentiful and not far from railway lines and convenient to good schools and churches. The climate is healthin.
