# REX

## Rex

## Arsenate of Lead

is not made to compete with the cheap Arsenate of Lead now being placed on the market, but is the very highest grade that is possible to make and is marketed entirely upon its merits.

The Rex Arsenate of Lead has many advantages over all other arsenical-insecticides. It has a splendid advantage over Paris Green in that it remains in suspension when prepared for use for a longer time and because of its adhesiveness it will stick to the foliage for the longest possible time.

Foliage sprayed in the spring and analyzed in the fall showed arsenate yet present on trees sprayed in June; developing web-worms were killed off in September without further treatment.

From this the user will realize that it is not necessary to spray as often with Arsenate of Lead as it is with Paris Green and various other arsenical poisons.
