# BRIDGE

We live in a world of bridges, not all of which are constructed of steel and cement. One of the most important bridges in today's world is still under construction, the bridge of understanding...between peoples and nations...spanning racial, economic, political and language barriers. Another important bridge is the bridge of print...bringing people together in a buying and selling situation. The bridge is a newspaper ad.

An advertisement in your newspaper is unparalleled in bringing people together quickly, economically and effectively. When you need to communicate with a customer or if you have something to sell through a want ad...use the most convenient bridge available...the pages of your hometown newspaper.
