

New Plant Plan At SC

Schoolcraft Community College is expected to begin implementing this year a plan which calls for the development of a maintenance staff with greatly expanded responsibilities for the physical plant of the college.

The board of trustees authorized funding for two additional positions this year at a cost of more than \$13,000. The plan will be further implemented over the next two years "consistent with monies available."

This would require expenditures of about \$100,000 during the 1974-75 year, and \$144,000 during 1975-76 if the plan was fully funded. This would include the hiring of 12 additional personnel.

An assistant to the director

of the physical plant will be hired for the last four months of the year at a cost of \$6,000. His yearly salary will be about \$18,000.

A second position of groundskeeper, who will head up the college's outdoor crew, will be hired for the last three months of the fiscal school year at a cost of \$3,000. His yearly salary will be about \$12,500.

This program will develop major maintenance projects in addition to the routine housekeeping chores now being performed.

The board has also called for a special report during this year's budget presentation outlining how the extended maintenance program is being implemented.

Area Deaths And Funerals

Do you really need all the electricity you use today?

Detroit Edison

You can't take electricity for granted anymore. So use only what you really need. After 9 p.m. and on weekends is the best time. By reducing daytime use you can help save oil and gas which are in critically short supply.

Wait until after 9 p.m. to start your dishwasher or clothes dryer. Turn out lights when you leave a room. You can think of many more yourself.

If you have questions, call our Energy Conservation Advisor at 237-9161 or your local Edison office.
