

Do your talents include installing new floor?

One result of the energy crisis has been to create a nation of homebodies out of the world's greatest travelers. Good or bad, it has some interesting side effects.

Persons spending more time at home are forced to take stock of their surroundings. This, combined with a slowdown in new home building and tight mortgage money, has led to an upswing in home remodeling and improvement.

With inflation adding to the woes, more and more homeowners are doing the work themselves, and saving substantially.

One of the first rooms that comes in for improvement is the kitchen. Remodeling may be a major project involving all new appliances, or a spruce-up, like painting the cabinets and papering the walls.

Or it could be putting down a new floor covering.

FIRST STEP was careful reading of the instructions. Special equipment included a carpenter's square, chalk line, adhesive, trowel, knife and scissors.

RETURN MATERIAL to room where it is to be installed and put in place. Roll back one half of material, spread adhesive, unroll material onto adhesive while still wet. Repeat same steps with remainder of material to finish job.

"WE DID IT." There's no greater feeling of accomplishment than the do-it-yourselfer admiring his and her very own handiwork.

PLANT A TREE... FOR ARBOR WEEK

Don't wait for shade! Now is the time to plant a tree for shade this summer. A tree cools your yard and removes dirt from the air. It becomes a home for birds and gives you beauty all year long.

WAYNE JONES

These are Selected Trees for Michigan:

LANDSCAPING PLANS

IF YOU'RE READY to plant your landscaping, but need help to know what to plant and where—bring in dimensions of your house and lot with a picture, and let us design a beautiful landscape for you. This is a free service for our customers.

AFTER TRANSFERRING measurements from chart to flooring material, cut along chalk lines using sharp knife and straight edge. Do transferring of measurements and cutting in some room where material can lie flat. Cardboard under cut lines will protect knife blade and surface underneath.
