

SHADES FROM 1936

Our friends who bought their shade trees from us when we opened our doors in 1936 have now been repaid many times over by enjoying hours of relaxing shade in addition to their beauty.

And those same shade trees will continue to provide enjoyment for our early friends' children... and their children. You see, trees are more than a purchase, they're an investment.

Spring is The Time To... Plant a Full Grown Tree

Folks, I have specialized in Shade Trees and have supplied thousands of street plantings, industrial, schools, churches and residential. I feel that the right selection of a shade tree is perhaps the most important decision that a home owner is faced with in landscape planning. You may select your tree... "tag it" and have it planted at your convenience.

SELECT FROM OUR MANY FLOWERING SHADE TREES

- MAGNOLIA • RED BUD • PINK DOGWOOD • WHITE DOGWOOD
- PURPLE LEAF PLUM • FLOWERING CRABS

SOME OF OUR OTHER SELECTIONS

- RHODODENDRON • JAPANESE MAPLES • PIN OAK
- MAPLE - HARDY, VIGOROUS
- MOUNTAIN ASH - SPARKLING ORANGE BERRIES
- LOCUST - FAST GROWING

EVERGREENS

We have a large selection of evergreens to add beauty to your landscaping. We feel the quiet beauty of an evergreen garden is the ultimate triumph.

*But if I held it ...
Could I touch the lightness of
This flutter-butterfly?*

Children get in act of planting a garden

Everybody wants to get in on the "act". Children are getting instruction in school on the planting of a garden with emphasis on vegetables.

The neighbors are talking about the pleasure of starting a garden and those who work in offices are already bragging about their plans to battle the cost of food inflation.

A vegetable garden must have a sunny location. Sometimes the shadow of a building or tree will give a shady location although the site may be on the east or west.

When children are involved it is important that they have a "say" in the shape of the garden and at least a section they can call their own to maintain.

It is important that the effort be successful. Careful reading of seed packages is essential and if plants are purchased they should be in prime condition.

Do a little verbal bragging about the children's participation. Visitors to the child's garden may help

assure more interest in its appearance.

A border of low-growing marigolds around the compact home vegetable garden will inhibit unwanted insects. This is a wonderful opportunity to expand the usual to-the-table vegetable selection.

Have you ever eaten kohlrabi right from the garden when the edible bulb on the stem is young. "Try it, you will like it".

Swiss chard is another good vegetable to introduce as the tops can be greens while the stalks can be eaten as asparagus.

If you have once eaten fresh peas from the garden your food taste will be on a new plateau.

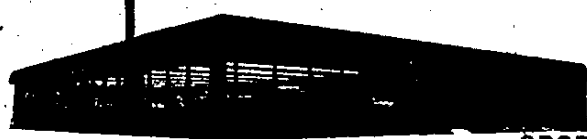

It is up to the leader in the family garden program to keep the project a pleasure for all participants, not as a chore but an opportunity to be active member of family togetherness.

Gardening as a hobby provides a person with a feeling of achievement and life seems to be viewed through new glasses.
