

Fashion prints bloom

Prints are running to the forefront in summer fashions. Yards of chiffon are drawn with summer flowers touting over-size petals. Body-hugging jerseys crawl with tigers, butterflies and species from the animal kingdom.

Summer shirting means topping gabardine slacks with nylon tapered designs over-populated with jockeys, horses or faces in the crowd.

Some prints pictured comfortable homes set in pastoral scenes. Others draw trees full grown in a field of foliage.

Bold bright colors, in combinations of green, orange and yellow; or blue, green and red, do the story-telling. Designed in everything from eveningwear to beachwear, the prints can liven the under-the-sun wardrobes of men and women.

Animals prints roar with color and contrast.
