

## SHOULD YOUR ASPHALT PAVEMENT BE SEALED?

Call us for our professional opinion

Most asphalt pavements are destroyed by the natural elements of oxygen, rain, heat, cold, & freezing. An unprotected asphalt surface is also on every target for the effects of chemicals... salt, gasoline, oil, detergents... and many other ever present enemies. Sealing by ASPHALT PRO-SEAL will protect the surface from these elements. It provides a tough shield over the asphalt surface, keeping harmful elements from attacking the asphalt.

It acts as an effective shield adding years of life to expensive paving surfaces.

# New life for your old suspension.

If it's time for a better ride, but not a new car, we've got Monroe Shock Absorbers to give your car's suspension better-than-new ride and control.

We'll help you choose from Mono-Matic®, our most popular shock, Super 500®, a true heavy-duty unit, or Load-Leveler® Stabilizing Units that help keep your car on the level. All have six valve stages that adjust automatically to all road and load conditions.

Or, we'll install Max-Air® air adjustable shocks that can carry either heavy or normal loads by simply adjusting the air pressure from 20 to 150 psi loaded.

PUT MONROE QUALITY BETWEEN YOU AND THE ROAD.
