

Home & Garden

WIDESPREAD interest in terrariums and aquariums has taxed the supply of books related to the subjects in local libraries. Copies of a 16-page booklet, "Aquarium and Terrarium Designs," can be obtained by sending 50 cents to: Vaungard, Inc., Bradley Street, Owosso, Mich. 48867.

Farm markets listed

Michigan residents are showing more interest in picking their own produce for home canning and freezing this season.

One indication is the number of requests coming to the Michigan Department of Agriculture for copies of "Country Carousels," a guide to pick-your-own farms and roadside markets in Michigan.

The 1974 edition, lists nine farm markets in Wayne County and more than 500 markets throughout the state.

The booklet is published by MDA with the financial cooperation of the Michigan Tourist Council which is helping to distribute the 80,000 copies.

The department plans to update the farm market lists again next year. County extension directors and chambers of commerce across the state co-operated in compiling the listings.

The booklet, whose popularity prompted the reprinting, also describes seven "tours through Michigan's countryside and invites families to take mini-trips and "rediscover Michigan's fertile fields and bountiful harvests."

Plant of the week

SCINDAPSUS AUREA

Scindapsus, known commercially as Pothos or Devil's ivy, is a fleshy, tall vine resembling the philodendron. It is distinguished from the philodendron by its ridged stem. The broad leaves are a waxy dark green with yellow variegation. Mature leaves grow to two feet long with blades lobed or slashed.

Soil should be rich in humus or other organic matter. Add broken brick, perlite or coarse sand to improve the drainage. Perlite attracts and holds moisture uniformly, furthering a healthy root system.

Water freely during the summer months but avoid overwatering in winter. Keep soil evenly moist, allowing it to become moderately dry during the growing season.

Temperatures can range between 62 and 65 degrees F at night and rising as high as 80 to 85 degrees during the day, with a relatively low humidity. During a dormancy or rest period keep the temperature a few degrees lower.
