

Ireland comes to America in a fisherman's hat

Go With A Hat On

Hold onto your hat fellow, it's coming back. Perched, slouched or slanted the hat returns this season. And it's an exciting re-entry of fedoras, Irish tweeds and Greek designs.

Wider brims slant down over one eye at night. Headgear for leisure time ranges from soft wool rounded caps with bills to the tweedy, stiffer fisherman's hat.

This season as men's clothing takes on a more total look, it is a perfect one for hats. For years women have worn hats as a final touch to an ensemble, sometimes as the focal point. Now, men have the opportunity to do the same.

Shorter hair makes headgear easier to wear. More styles make headgear easier to choose. Colder weather makes headgear essential, so why not make it fashionable as well?
