

Corduroy makes traveling easy for Roger Young

Athletes Travel Light

When your lifestyle is on-the-go your wardrobe better match. Particularly if you make your living by thrilling crowds and utilizing muscles.

Sports figures probably do the most traveling of any professional group. With their mind on the game, clothes must be comfortable, versatile and ready-to-go.

Detroit Loves World Tennis team stars George "Butch" Sewagon and Allan Stone and amateur bicycle racer Roger Young cover a lot of territory in their respective sports. That requires an always packed suitcase.

Whatever your status, sports figure or spectator, there's no reason for cumbersome clothes. This season provides the simplest.

Suede and leather make an important fall entrance. The fabric packs easy, never wrinkles and lasts forever.

In shapes of longer jackets matched with slightly flared pants, safari looks and entire suits-suede and leather go anywhere.

Corduroy is another great fall packable. Light tans, rusts and dark brown pants join sweaters, shirts or sports coats for versatility.

For winter months something warmer comes in wool. Simple sweaters that pull over or wrap combine with cuffless and tapered trousers.

Add a shirt and tie to the trousers, pull on a bold plaid or subtle tweed jacket and be ready for a sporting evening.

When packing a suitcase, remember to keep color and print in mind. Make your wardrobe one that is versatile merely by adding a tie or changing your trousers. Make it one that will withstand a week of jet-setting without a wrinkle.

Anatomy of a Root

Fine Canadian Leathers

The soft skins are naturally finished, so in Roots you'll look as good as you feel.

Rocker Sole

In a natural stride, weight moves from the heel, along the outer side of the foot then diagonally across to the big toe, which springs you off on your next step. Roots rocker sole helps this shift in weight, making every footstep just a little less tiring.

Supported Arch

The city sidewalk can be a real arch-enemy. And fallen arches hurt. Roots are contoured to support the arch and the small recess between the balls of your feet.

Recessed Heel

Walk on sand and your heel will leave the deepest part of your footprint. In natural walking, most of your weight lands on your heel. Conventional shoes—even low heeled shoes—tilt you forward and change your basic posture. In Roots, your heel sinks into a comfortable recess, giving you a natural walk on any kind of surface.
