Ride the air with push-button shock absorbers.

MONROE ANNOUNCES THE MAX-AIR™ ELECTRIC RIDE CONTROL SYSTEM

It's a whole new system.
Now you can tune your car's suspension for every possible load right from the front seat of your car. Just press a button on the dash-mounted control panel. And keep your car on the level no matter how much or how little you're carrying. A powerful electric air pump (150 psi loaded) automatically adjusts the Max-Air™ air-adjustable shock absorbers.

Infinitely adjustable.
The beauty of the Max-Air Electric Ride Control System is its flexibility. Your car is supported on an infinitely adjustable column of air. So you can add extra muscle to your car's suspension whenever you need it for heavy loads or towing. All with the push of a button. And all with a premium quality Monroe ride. And there's more.

Blow up a tire.
The system includes an extra auxiliary hose and fittings. So you have an instant on-board air supply. For example, you can keep your tires at exactly the right pressure. Or inflate a friend's tires. Or rubber rats. Or basketballs. Or bicycle tires. Or whatever needs inflating. Just push the button. See your Monroe Dealer for the whole story. And ride the air.
