The World's Most Powerful Receiver

\$1250

marantz Model 4400

We sound better.

All the Marantz features, and then some! Power to spare, at 125 watts per channel in stereo — or over 50 watts per channel in quad. A built-in oscilloscope, for exact tuning or complete Audio display.

And to top off the fine sound of this receiver, it has the built-in Dolby noise reduction circuit, for noise-free listening without any loss of the full frequency of music.

Come in for a demonstration.
