Old that's new

Home furnishings have refocused on the best designs the past has to give. From an ancient Chinese stone carving comes an elegant six-panel wallcovering called "Processional" from Van Luit. Maintaining the oriental theme is easy with such a background. From the New World come exquisite furnishings that are just what the doctor ordered for the bi-centennial — and forever. Heritage's "American Tour" collection provides the trestle table, Georgian breakfront and the stenciled Windsor chairs and benches.
