# New law licenses paramedic units

By ELMER E. WHITE

The ballots are all counted for two years, but there's still much talk in Lansing about campaign reform. Common Cause, the citizen's lobby, is launching an initiative petition drive aimed at reforming Michigan laws on campaign financing, lobbyists' disclosure and conflict of interest.

Along with that, a state lawmaker is urging incorporation of language dealing with a fair campaign practices commission.

State Sen. William Ballenger, R-Lansing, who is leaving the Senate Jan. 1, says the current fair campaign practices commission is "hopelessly ill-equipped to do its job, and in fact, technically defunct" because member-

ship has not been reappointed since the group was reactivated for the 1970 election.

Ballenger says the current commission has "a single harassed clerk handing out secret, hastily-conceived curbside opinions without consulting other commission members or all other parties involved."

"If we are going to have a fair campaign practices commission—and I believe that we should have—it must be a legitimate agency, operating legally, with full funding and with the authority to enforce its rulings," says Ballenger, who was a prime force for campaign reform legislation in the Senate.

**YOU TOO CAN GATHER** wild hickory nuts.

Michigan's Agriculture Department notes that this is not season in the state, and points out that residents may find black walnuts, butternuts, beechnuts, hickory nuts and hazelnuts.

"If you're a real nut on roughing it, take the family out to gather wild nuts," the department suggests.

**INCONSISTENT TO SAY** the least—that's how some of Michigan's farm organizations find rural mail movement.

In some cases, for instance, letters addressed to different people in a small area and mailed on the same day arrive as much as four days apart.

Gov. William Milliken took that information into consideration in a recent letter to Congressman William V. Alexander, chairman of the House Subcommittee on Family Farms and Rural Development.

Milliken voiced concern over the slowness and inefficiencies of rural mail throughout the 15-state midwest region.

He said the "unique needs" of rural areas must be taken into account since they are often populated by larger numbers of older citizens and the very young than are other areas.

"This population finds it more difficult to travel the additional distance to a post office than the general population as a whole," he said.
