

A PERFECT SYMBOL

In most cases, the man will settle for a small ceremony and a large reception.

The dress for a second marriage is accordingly simple but nonetheless elegant. The bride carries flowers; has attendants; (not more than two for even a semi-formal affair).

Engraved invitations and announcements are proper; so are pre-nuptial parties and showers.

In deference to tradition, the second time bride skips the bridal veil per se, although a veiled head-dress can be worn.

Rules for the remarriages of widows and of divorcees differ from church to church and a can-

did conference should be called between the couple and pastor of the church in which they would like to be married.

The rule against the second-time bride wearing white is considerably relaxed and so is the taboo of having children from a previous marriage at the second ceremony. The ages and attitudes of the children are to be considered.

Most of the etiquette surrounding a second marriage is completely dependent on the common sense and emotional maturity of individuals.

For example, in the case of a widow remarrying, should former in-laws be invited? Certainly not if it will cause discomfort to persons involved. Why not? If there is happiness and understanding on all sides.
