

THIS VERSATILE, wide-tracked work vehicle now is available from PPT of MICHIGAN, owned by Vern Converse III, president of Scans Associates Inc. of Livonia

# Tracked work vehicle designed to get there

An economical, heavy-duty, tracked work vehicle, ideal for transporting people and equipment to and from otherwise inaccessible industrial sites, is now available from PPT of MICHIGAN.

The company, a subsidiary of Grand Bay Inc. of Franklin, is owned by Vern Converse III, president of Scans Associates of Livonia.

Known as the PassesParTout (PPT), the rugged workhorse is available in three different models built of high-strength steel and designed for trouble-free performance.

Small enough to fit in the back of a pickup truck, the PPT can carry up to 1,000 pounds in the three-by-four or five-foot cargo area behind the driver after removing two passenger seats.

SMALL SIZE and ability to turn on the center of one track permit maximum maneuverability in mud, sand, marshlike land,

deep snow or rough terrain. A low center of gravity, wide body and anti-skid traction assure safe operation on steep slopes. Optional rail bars offer extra protection.

Two endless tracks are made of tough rubber-coated three-ply nylon. Automotive-type clutches control the tracks individually, and disc brakes are standard. All types of mechanical and hydraulic attachments can be mounted to the body.

Medium speed, four-cycle, high torque engines with electric starters and a mechanical transmission with two forward speeds and reverse are standard. A two-cycle engine is available on the smallest model for light work at higher speeds.

PPT is being used by police departments, utilities, hunting clubs and ski resorts. The unit also is suitable for mining, logging, exploring, surveying, farming, construction, maintenance and repair work.
