Figure 10 is a line graph showing the percentage of total energy expenditure (TEE) for different activities over a 24-hour period. The Y-axis is labeled 'Percentage of TEE' and ranges from 0 to 100 in increments of 10. The X-axis is labeled 'Time of Day' and ranges from 0 to 24 in increments of 2. There are four data series: 'Rest' (solid line), 'Light' (dashed line), 'Moderate' (dotted line), and 'Heavy' (dash-dot line). The 'Heavy' activity is concentrated in the morning, starting at approximately 15% at 0 hours, peaking at about 25% between 2 and 4 hours, and then declining to near 0% by 6 hours. 'Moderate' activity is spread throughout the day, starting at about 10% at 0 hours, peaking at about 20% between 10 and 14 hours, and then declining to about 10% by 20 hours. 'Light' activity is also spread throughout the day, starting at about 10% at 0 hours, peaking at about 20% between 10 and 14 hours, and then declining to about 10% by 20 hours. 'Rest' is the most common activity, starting at about 10% at 0 hours, peaking at about 40% between 18 and 24 hours, and then declining to about 10% by 6 hours.
