Turkeys are dumb birds

gets lonesome for his mates inside he'll get blisters on his feet walking back and forth along the fence to find a hole through which he can crawl

IF YOU DON'T think it takes pa-lence to raise turkeys, just visit a tur-cy farm and watch the caretaker try o get them from one pen to another.

Most other animals can be rounded up quite easily, but not the turkey. You have to have the patience of Job to get them all moving in the right direction at the same time.

You should see them in a storm, especially sand storms. They stampede like cattle until they hit a barrier. And wee unto those birds that get there first. They don't usually live to gobble about it.

No, they are not cowards: They are just dumb enough trying to beat each other in the race to safety. But let a big dog, or a human, come along and they'll gang up on him

One must be mindful of those beaks, too. They are sharp, and if you stoop to pick up an object, they can draw blood from the most tender part of your body.
