It pays to know a DETROIT BANK-er better.

"If you make \$10,000 or more a year, I can show you how to get a \$1,500 income tax deduction and use it to start your own retirement plan."

Recent legislation has made it possible for individuals and self-employed persons to establish their own retirement plan through a special savings account called an Individual Retirement Account. We asked DETROIT BANK-er Robert K. Smith to explain this new service.

Who is eligible for an I.R.A.?

"An Individual Retirement Account, or I.R.A., may be opened by any employed or self-employed person not currently covered by any other retirement plan. Even if you are already enrolled in a retirement plan, but have a working spouse who is not, he or she is eligible."

How does an I.R.A. differ from a regular savings account?

There are important differences. First, all contributions to your I.R.A. are fully tax deductible. What's more, even the interest earned on this account is exempt from income tax until it is withdrawn. And when you finally begin making withdrawals, you pay taxes only on the amount you withdraw each year. Like

savings accounts, however, I.R.A.'s offer a range of plans paying annual interest rates from 5-1/2 to 7-1/2 percent and are insured to \$40,000 by the Federal Deposit Insurance Corporation. Incidentally, these are the highest interest rates that any bank can pay.

Are there special regulations for I.R.A.'s?

"Yes. Regulations only permit you to save a maximum of \$1,500 a year, or 15% of your annual wages, whichever is less. You can open an Individual Retirement Account with just \$25, then it's up to you when and how much you want to deposit, in amounts of \$25 or more, up to your maximum each year. You can add to your account each payday and when your savings reach \$1,000 or more, you can convert them to 6-year 7-1/2% Investment Certificates; or if you make your annual deposit in one lump sum, you can put it into 6-year 7-1/2% Investment Certificates at that time. The money must remain on deposit at least until you reach age 59-1/2, unless you become permanently disabled.

Should you withdraw prior to that, Federal regulations for Investment Certificates require that you pay substantial penalties on the amount withdrawn, and I.R.A. regulations impose further penalties for premature withdrawals."

Being tax-sheltered, savings in an I.R.A. should accumulate much faster, right?

"Amazingly so. In fact, here is a chart which shows what you could accumulate if you invested \$1,500, before taxes, at the beginning of each year. The first column shows how your interest accumulates with the help of a tax-sheltered I.R.A., the second shows how your interest accumulates without the help of a tax-sheltered I.R.A. and the third shows the difference."

At the end of	7-1/2% Interest with help of a tax-sheltered I.R.A.	7-1/2% Interest without help of a tax-sheltered I.R.A.	You gain with an I.R.A.
10 years	\$ 23,790	\$15,528	\$ 8,262
20 years	51,433	42,780	28,653
30 years	113,688	96,663	63,085

*Table assumes taxpayer is in a 25% tax bracket and that the total contribution is deposited at the beginning of each year.

How can I start my Individual Retirement Account?

"It's as easy as opening a savings account. Just let your DETROIT BANK-er know you want to open an I.R.A. and \$25 will get you started. Establishing a useful tax-shelter is another good reason why you ought to know a DETROIT BANK-er better."
