Headless Butterflies.
To the butterfly, unlike most creatures, the head seems to be not indispensable. Reporting some experiments to the French Academy of Sciences, Professor Vigney of the Lyons university stated that a number of insect larvae were carefully beheaded and that in spite of this they went through the usual stages of metamorphosis. Caterpillars of the genus bombyx become mature butterflies, with fine colored, streaked wings. They were little troubled by their headless condition and lived for a considerable time.Milo Was a Gladiator.

An ordinary meal for this gluttonous Titan was twenty pounds of bread, twice that much meat and fifteen pints of wine.—Exchange.

Automobile Show

Detroit, Jan. 20-27, 1917

We ask the people of Farmington who are interested in Automobiles, whether thinking of purchasing a new car this season or later, to be sure and visit the BUICK BOOTHS at the

Annual Automobile Show in Detroit

January 20-27, 1917

The complete line of BUICK CARS, comprising in all, Seven Valve-in-the-Head Motor Cars, will be shown there. These models range from the new Six-Cylinder, Seven-Passenger Buick, which is just announced and which will be shown for the first time, to the Four-Cylinder Roadster.

In all these cars the famous Buick "Valve-in-the-Head Motor" is the base upon which Buick engineers worked. In each model the effort was to build a car that would prove worthy of the Buick Motor, and in each instance, judging by the widespread favor with which Buicks are received by the motoring public, these efforts were successful. The prices range from

\$660 for the Model D, 4-34 Roadster, to \$1385 for the New Six-Cylinder, 60-Horsepower, Seven-Passenger Touring Car.

Meet us there and let us show you this wonderful line.
