## Annual Flowering **Plants**

By L. C. CORBETT rt, Bureau of Plant Indus

PETUNIA

PETUNIA

Because of the ease and facility with which all of the single-flowered varieties of the petunia can be grown from seed that plant commands attention as a worthy candidate for the summer flower garden. The young plants grow rapidly and come into bloom eavil, and in addition to this they furnish a continuous weath of blossoms juntil destroyed by frost. The large-flowered strains are very beautiful ind of great variety. While the single sorts are common and inexpensive, the double giant-flowered with the summer of the pure they must be reproduced from seed which sets only after careful hand point in the set of the flowers, which or from cuttings, of which an individual plant can supply but at limited number.

For beed results the seeds of all

can supply out a imited number.

For best results the seeds of all sorts should be sown in a gentle hot-bed, cold frame, or in fine soil in a box placed in a sunny window in March or early in April for localities

blues and purples of every slude to almost black. There are velvety single self-colors, a few doubles and semi-doubles, others with quilled or medical period of the self-colors, a few doubles, others with quilled or medical self-colors, and the self-colors are velocity of the self-colors of the

While the plant does not grow as bustly as those named above, it is adapted for covering low screen which should be sown in a rich border rather: thickly, about corn-planting time, and the young plants thinned to stand 4 to 6 inches apart in the row.

COLUMBINE
(Aquilegia)

The columbine is a hardy perennial, with many horticultural varieties, and is a desirable horder plant. Its habit of growth is to form large clumps. It

profusely early in the

blooms profusely early in the season and remains in bloom for a considerable period. It is quite had, and is useful for cutting. The peculiar pendant if dowers are interesting in themselves because of their unusual form, and this feature takes In\_connection with the graceful habit of the plant, gives each clump of columbiane a striking and interesting appearance. Sow the seed in the open ground in apring, preferably where the plants are to grow, and thin the young seedlings to about a foot apart. Seeds may also be sown in the autumn for flowering the following season. The plants thrive well under good garden culture, but such area sorts as Aquilegia carculas and A. chrysantha do best in partially shaded, well-drained noots. Few heaty perennials are so easily grown from seed.

The American Way.

# Died of Premature Old Age! A Cleveland Woman Speaks

Died of Premature Old Age!

How many times we hear of comparatively young persons passing away when they should have lived to be 70 or 80 years of spe. This fatalt work is more to become all run down, weak and when the kinges degenerate, it causes auto-intoxication. The more fault work is more to become all run down, weak and support to the become all run down, weak and then the kinges degenerate, it causes auto-intoxication. The more fault was a the quicker will those noble organs be degenerated, and the sooner they decay.

It is thus the wisest policy, to prevent premature old age and promote long life, to lighten the work of the kidneys. This can be done by drinking plenty of pure water ail day long, and occasionally taking Aunte, double strength, before meals. This can be done 31 of 10 to Dr. Pierce, larvalités Hort it dissolves urie acid as water does augar.
