OPPORTUNITY FOR DAIRYMEN

ndustry is Paying in Most Sections of State—Good Time to Raise Helf-er Calves.

state—Good Time to Raise Helifer Calves.

By J. A. WALDRON,
Extension Agent in Dairying, Michigan
Applicultural College.

East Lansiog, Mich.—Michigan
dairymen are awakening by inches to
a realization that for them the present is a season of opportunity.
In a few restricted areas where low
prices for milk—offen set by a previous
outner—still prevait, and whee
the high dost of keeps, the latiness
are did. But the industry on the whole
to returning as good a profit now as it
ever did. Slowly, though none the less
surely, prices are gradually reaching a
lievel commensuriate with the cost of
labor and feed, and for the producer
of dairy cattle the future has never
seemed more hopeful.
A junuabjer of reasons theleful in the proseried more hopeful.
A junuabjer of reasons the deep the
seried more hopeful.
The property of datry products
from the United States to Europa have
t grown immensely, while the need for
cattle has increased encomously as a
fressit of the witherpread, shauchtering
of European herds. It has been estimated that at the present time there
is a world shorting of 30,000,000 med.
For a man who reads the writing on
the wall this means that the present in
all dependent of the with the cast
will depend in ho small measure the
usefulness of the datry cow ratsed
from it. The youngster must be
"throught up" with proper attention to
feeding and other details.

A few suggestions which may be
heliful it raising and developing a
datry helefer alive for the first of
the proper in the present in the
feeding and other details.

height in raising and developing at darty helfer call are accordingly offered:
First—The dairy calf should be given by the call and accordingly offered its mether's milk for the dirst ten days, and lit it is a west individual, for at least three or four weeks.
Second—The calf should not be overfeel. About two quarts at a feed its smiledent.
Fourth—The change from whole milk to skim milk should be mide arrivally during a period of ten days. At the same time the number of feeds style on day is build be reduced from three to two.
Fifth—Increase gradually during the feed allowance until the calf is receiving from four to See quarts from four to See quarts from the same time the number of feeds allowance until the calf is receiving from four to See quarts from the See of See of

bean.

Seven-Teach the calt to eat grain by placing dry grain in the bottom of the pall, or directly in its mouth.

Eighth-Feed biright, clean luny.

Kinth-Peed biright, clean huy.

Kinth-Peevent scours by regular feeding, feeding, in clean palls, avoiding over-feeding, providing clean, dry stables; allowing plenty of sunlight to enter, and by keeping, the manger free from sour feed.

If skim milk is not available, the following bome-mixed calf meal, first tried by the Purdule cyseriment sixting bome-mixed calf meal, first tried by the Purdule cyseriment sixting bome-mixed calf meal, first tried by the Hominy or cyrimeni, old meal O. P., bloof, floor and red dog, flour or flour middlings, in equal parts; at the rate of one pound of mixture, to one gallon of winter. This should be fed like skin milk, though not in excess of one gallon at a feed.

PI AN RIG WEEK FOR FARMERS.

PLAN BIG WEEK FOR FARMERS

Leading Men of Country Appear at College During March 4, 5, 6, 7 and 8.

Colege During maren ", 5.

6,7 and 8.

From Office of Publications, Michigan Agricultural College.

East Lansing, Mich.—A new kind of farmers week, or round-up as it has been known in the part, will be tried out by the college during the week of March 5, 78, 7 and 8, to bring home to agriculturists of the state facts bearing upon the present emergency which may clear up many of the current university of the state facts bearing upon the present emergency which may clear up many of the current will be where their dury lies. For this purpose many of the nation's leaders in whole where their dury lies.
