Does YOUR Back Ache?

NEARLY everybody suffers from kidney disease at some time or other. One may think he is perfectly well and even force himself to say he is "all right," but his tired movements and languid expression tell more plainly than words that he is in an unhealthy condition.

Backache is a symptom of weak disordered kidneys. Rheumatic pains, stiff joints, sore muscles are others. These symptoms indicate that the kidneys and bladder need help to do the work of filtering and casting out from the system poisons and waste products that cause trouble.

Foley Kidney Pills

give quick and permanent relief in kidney bladder troubles that have not reached a chronic or advanced stage. They stop bladder irregularities, strengthen the kidneys and tone up the liver.

Paul Darkow, Stewart, Minn., writes: "Two years ago I had a pain in my back so severe that I could not walk. I thought it was kidney trouble. I bought a 50-cent bottle of Foley Kidney Pills and after taking about half the bottle was completely cured. I have had no recurrence of the trouble."

If you have any cause to suspect that your kidneys need help, you will make no mistake in taking Foley Kidney Pills. In 50c and \$1.00 bottles.

They're Deadly Foes to Gas Waste—the Chalmers Hot Spot and Ram's-Horn Manifold

These are days when the sagacious person is cutting out all forms of waste in his shop and in his home.

No doubt the objection that has sent thousands to see the new Chalmers with its two great devices that Hooperize gas.

One of them is the new noted Hot Spot, which cracks up and heats up the raw gas into a cooked condition for wonderful power results.

The other is the Ram's-Horn Manifold, which of the two is probably an even greater device.

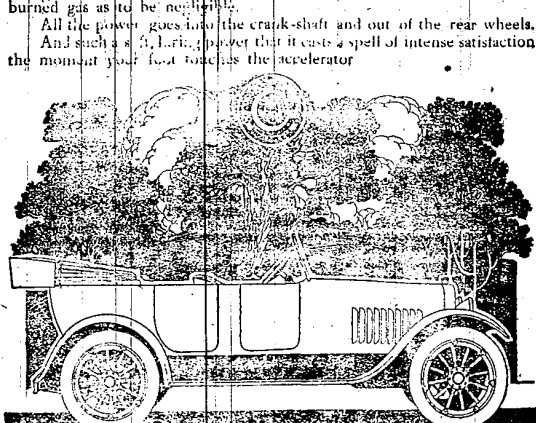

For it takes the gas vapor from the Hot Spot and carries it 14 inches equi-distant to each cylinder without sharp turns, angles or pockets where the vapor might lodge.

So that at the moment of sparking, the gas is (like the charge in a large projectile) ready for 100% results.

There's so little that comes out of the exhaust in the form of unburned gas as to be negligible.

All the power goes into the crank-shaft and out of the rear wheels.

And such a soft, lasting power that it casts a spell of intense satisfaction the moment your foot touches the accelerator.
