Applying Fertilizers on Wheat

1. Apply all the fertilizers through the fertilizer attachment of the grain drill at seeding time.

2. If you have no drill with fertilizer attachment, apply all through broadcast lines and fertilizer distributor.

Be sure to work the fertilizer into the soil thoroughly before sowing wheat.

FINDS FERTILIZER PAYS

Increases Yield of Wheat and Oats

According to the Indiana Farmer's Guide, John Steedman of Decatur, who is one of the most successful farmers in Miami county, Indiana, consistently uses fertilizer to supplement the manure on his fields, and is well satisfied that the return justify the money invested in fertilizer. He says: "I have not sown any wheat without fertilizer since 1895, and I have averaged better than 30 bushels to the acre during that time. My best yield in wheat, which I sowed 225 bushels, a comparison of Mr. Steedman's yield with the average yield of Miami county shows how good our crops are. The average for Miami county is about 20 bushels, and for the same year the average for the entire state of Indiana was only 27 bushels.

Mr. Steedman also says that the use of fertilizer enables him to harvest his crop much sooner than otherwise. He says: "In 1895, I harvested 225 bushels," a comparison of Mr. Steedman's yield with the average yield of Miami county shows how good our crops are. The average for Miami county is about 20 bushels, and for the same year the average for the entire state of Indiana was only 27 bushels.

Model Rural School

The Michigan State Fair association has erected and equipped a model rural school building on the state fair grounds at Detroit. The plans and specifications of the building were furnished by the Superintendent of Public Instruction. The building embraces all of the essentials of a modern schoolhouse. The dimensions of the schoolroom, interior arrangement, lighting, heating, ventilation, wardrobes, toilet facilities, seating, etc., are all correct. The equipment is complete.

No one interested in rural education from the standpoint of parent, pupil or officer should fail to spend a half hour in this building some time during the session August 30 to September 8, 1918.

This building is not a temporary structure, but will be a permanent feature of the fair each year. It will be used as headquarters for the state fair boys' school, for canning demonstrations, for boys' and girls' state club work, and as a concrete example of the proper construction and equipment of a rural school building. The possibilities of this feature of the fair are very great.

The state fair association is to be commended for its cooperation in securing better rural school advantages.

The superintendent of public instruction and the school commissioner extend an invitation to all Oakland county people visiting the fair to call at this building.

"My Country 'Tis of Thee, Sweet Land of Liberty."

Probate Order

Order Appointing Time for Hearing
STATE OF MICHIGAN,
The Probate Court for the County of
Oakland.

At a session of said court, held at the
probate office, in the City of Pontiac, in
said county, on the Twenty-sixth day
of August, A. D. 1918.

Present, Hon. Ross Stockwell, Judge of
Probate.

In the matter of the estate of

John H. Benjamin, deceased.
Isaac Bond, administrator
of said estate, having filed in said court
a petition praying that the time for

the presentation of claims against
said estate be limited and that a time and
place be appointed to receive, examine and
adjust all claims and demands against

said estate, it is ordered that four months from
this date be allowed for creditors to present
claims against said estate.

It is further Ordered, That the Thirtieth day of December, A. D. 1918, at nine o'clock in the forenoon, be and is hereby appointed for the examination and allowance of all claims against said estate.

It is further Ordered, That public notice
hereof be given by publication of a copy
thereof in the newspaper printed and
circulated in said county.

ROSS STOCKWELL,

Judge of Probate.

The Fordson Tractor

The Fordson tractor, manufactured by Henry Ford & Son at Dearborn, Michigan, is here.

Hundreds of farm owners in this community will be interested in this and encouraged—knowing that Fordson tractors are ready to distribute.

The village need for a tractor, and the vital necessity of employing man-making machinery in apparent to everyone. Remembering the huge immense tasks ahead, the coming of the Fordson is of importance to every Farm owner at this time.

The Oliver No. 7—the Plow for the Fordson

Oliver No. 7 has been built for the Fordson.

Henry Ford & Son recommend it as the plow that will work to the best advantage with their machine.

Oliver No. 7 is sturdy a one-man machine. A trip lever right at the operator's hand raises or lowers the bottoms. An even depth adjustment lever is right at hand, too.

You will find the high clearance of plows and beams because the tines turn sideways as the rate between bottoms prevents clogging with trash and makes every second of operating time count in plowed ground.

The Oliver No. 7 embodies principles of plow construction founded on sixty years of making plows, of intensive study of every existing condition—constant attention to the plow required to make the tractor suitable for the industry began.

Come and see this complete outfit—the Fordson and the Oliver No. 7 Plow.
