

## TROOPS CONVOYED TO FRONT LINES BY MOTOR.

British reserve troops being hurriedly conveyed to the front lines by motor vehicles. A detachment of the medical corps is on foot.

## Forward!

With no thought of bursting shrapnel and poisonous gases into which they plunge—with every muscle tense, with every faculty of mind alert, with one thought only—TO FIGHT AND WIN.

That is the way our men are going into battle. When the shrill whistle sounds the advance, out they go—their whole heart in the task before them. No power on earth can hold them back.

## Forward!

The same sharp challenge to battle is sounding for us. We must answer in the same proud way—the way of our fighting men—the American way. We must lend the way they fight.

We must show the war-maddened Hun a united American people moving forward—shoulder to shoulder, irresistibly, to Victory.

Our task is to supply the money, the ships, the guns, the shells that we must have to win. It is a tremendous task. We must do it as our fighting men do theirs—with the indomitable spirit of Victory.

We must work, and save, and lend with one thought only—TO FIGHT AND WIN.

Get into the fight—with your whole heart. Buy Bonds—to the utmost!

## Resigned in Favor of Horse.

A prosperous grocer had occasion to engage a new errand boy. Trade was very brisk, and the lad had a great deal of work to do in delivering parcels in different parts of the town.

"Well, Johnnie, how did you get on on Saturday?" asked the grocer on Monday morning.

"Oh, fine," replied Johnnie, "but I'll be leavin' at the end of the week."

"Why, Johnnie, what's up?" queried his master. "Are the wages not high enough?"

"I'm not findin' any fault with the pay," replied the boy, "but the fact is, I'm d'nn a good horse out of a job here."

Pride.  
"My brother's a corporal in the army."

"That's nothin'. My brother's a marine."

True.  
"I got a difficult game to master?"

"I guess so. Nobody's ever mastered it yet."

## Would Have Hunk Waxed.

A negro in a precinct of the Fifth ward added a little humor to the stern feelings of those who were filling out their cards.

"My name's Elisha Smith," he said to the registrar.

"Any middle name?" the officer asked.

"Yes, 'n," replied the negro.

But he didn't know what the "n" stood for, so he said:

"Make it 'Nick.' When I was little my mother used to call me Nick because I was so mean and always had blood in my eye. You can send a message to those Hun devils that Nick is coming after their scalps."—Kansas City Star.

The Same Number.  
"Tummy (crying)—Oh, Bill! 'Ow many hells in 'Ovovolen?"

Bill—Two hells, same as in 'Ovovolen.

No matter how well you do a thing, you are sure to hear more complaints than compliments.

**160 ACRE FARMS IN WESTERN CANADA FREE!**  
Get under the Shower of Gold

coming to farmers from the rich wheat fields of Western Canada. Where you can buy good farm land at \$15 to \$20 per acre and raise from 20 to 45 bushels of \$2 wheat to the acre it's easy to make money. Canada offers in her provinces of Manitoba, Saskatchewan and Alberta

**160 Acre Homesteads Free to Settlers**  
and other land at very low prices. Thousands of farmers from the U. S. or their sons are yearly taking advantage of this great opportunity. Wonderful yields also of oats, barley and flax. Mixed farming is fully as profitable an industry as grain raising. Good schools, markets convenient, climate excellent. Write for literature and particulars as to reduced railway rates to Supt. Immigration, Ottawa, Canada, or to

## NEED OF EXPERT TO FIX BATTERY

Starting Mechanism of Car Is Regarded by Too Many Motorists as a Mystery.

## TIME FOR MAKING REPAIRS

Should Be Opened for Owner's Inspection and All Separators Removed—Reinsulating May Be All That Is Needed.

"Despite the educational campaign carried on by battery manufacturers, a great majority of motorists still continue to treat their starting batteries as a mystery, and the same question is occurring day after day. Who should a battery be repaired and when should it be thrown away?"

The answer to this is, "Put yourself in the hands of an expert and at the same time keep the following points in mind," says E. T. Kates, manager of a battery depot in Washington.

"Have your battery opened for your own inspection, and all separators removed, so that the entire surface of the individual plates may be readily seen.

Expense of Reinsulating.  
"If the examination shows that the positive plates (the chocolate brown in color) and the negative plates (plate gray) are mechanically intact it is simply a case of reinsulating the plates with separators, and this can be done at an average expense of approximately one-sixth the cost of a new battery.

To make makes of batteries a very thin wood separator or insulating material is used, and, judging from carefully kept records, extending over a period of one year, these very thin separators break down in approximately eight months' time, whereas the thicker type of separators last twice as long.

"If the positive plates are severely warped or show excessive loss of material, a new set of positive plates and new separators are necessary. The cost of this repair is approximately 50 percent of the cost of a new battery, and such repairs would give a battery life about equal to the life obtained from the first set of positive plates.

In many cases the life is longer, as the owner of a new car usually abuses the car and the battery in the early part of its life. Repair or renewal of positive plates is perfectly safe as the positive plates are almost equal in life to two sets of positive plates.

Purchase New Battery.  
"If the examination shows that the negative plates are excessively worn in addition to the positive plates it is very advisable to purchase a new battery, as the cost of repairs in a case of this kind is excessive by comparison.

"There may be some slight variations from the above principles, but they are exceedingly few and rare.

"Don't get your knowledge from the outside of the battery box—obtain a complete idea of the inside before you double it over so that both surfaces are cutting surfaces. Next, put a hole in the cloth so that the valve stem may be passed through and the emery cloth brought close against the valve head. The valve is then placed in position for grinding under comparatively high pressure. Both sides of the emery cloth will conform to the valve head and the seating, and if the valve turns and the emery cloth remains stationary the valve will be ground on the upper emery, whereas if the cloth revolves the valve seating will be ground on the lower emery.

## GOOD VALVE GRINDING HINT

Piece of Emery Cloth Can Be Employed Satisfactorily, If Directions Are Followed.

In cases where a badly pitted valve requires grinding there is a short cut. Cut a piece of emery cloth in dimensions a little bit wider than the valve seating and twice as long and then double it over so that both surfaces are cutting surfaces. Next, put a hole in the cloth so that the valve stem may be passed through and the emery cloth brought close against the valve head. The valve is then placed in position for grinding under comparatively high pressure. Both sides of the emery cloth will conform to the valve head and the seating, and if the valve turns and the emery cloth remains stationary the valve will be ground on the upper emery, whereas if the cloth revolves the valve seating will be ground on the lower emery.

## SELECT BACK ROADS FOR MOST PLEASURE

Advice to Motorists Who Prefer Not to Eat Dust All Day.

Average Motorist Is Learning That There Are Two Kinds of Highways—One Is Main Road Utilized Mostly by Speeders.

There are at least two distinctive classes of motor-car drivers. One includes those who desire to get from a given point to another given point in the shortest possible time. The other enjoys motoring because the automobile gives one a chance to see the beauties of nature, to seek out quiet and primitive spots, and to view the country at its best. There is a sharp line between the two. Most of the casualty lists are made up of members of the first class. Accidents to the driver who is in no particular hurry are more infrequent.

A man who has driven a car for several years says that one can tell the speed of a car without a device that registers the number of miles an hour. When the car is going 20 to 25 miles an hour there is plenty of conversation on the back seat. The occupants point out things of interest and comment thereon. When the speed goes up to 35 or 40 miles an hour there is less talking, and when a higher mark is attained there is dead silence. Everybody in the car has his eyes glued on the road ahead, and is hopeful that nothing will happen. There is no time and no inclination to talk, even if the rush of air would permit it.

Happily, the average motorist does not drive at an excessive speed, and it is the average motorist who is learning that there are two kinds of highways. One kind is the main road between cities, much utilized by speeders. The other is a network of roads, which the speedometer and who brag on what they have been able to "get out of."

The other kind of driver is learning that there usually is a back road. At this season of the year many of these back roads are in better condition than the main highways. They are smoother, less rutted, and the surrounding country, as a rule, is prettier and more pastoral. The man who seeks out these back roads may have to drive a few miles farther than he had hoped to, but the quiet and beauty of the scene more than pay for the extra gasoline.

## TESTER FOR A LEAKY VALVE

Simple and Certain Method Is to Apply Small Bottle of Water as Illustration Shows.

Leaks at the valve in a tire of a bicycle automobile or other vehicle are difficult to locate by ordinary examination of the suspected valve. A simple and certain method is to apply a

## Testing Leaky Valve.

small bottle of water to the valve. As shown, both with and without the valve caps in place. The cap is often sufficient to hold the air, hence this added test. If the valve leaks, replacing the plunger with a new one is the most effective method of overcoming the trouble.

## HOW BRAKES ARE ADJUSTED

Not Advisable to Remove Slack at Same Place—First on Rods, Next on Bands, Etc.

In taking up on the brakes do not always remove the slack at the same place. There usually are two or three places in the brake assembly where a "take-up" is possible, and each time the brakes are adjusted a different place should be used. The first time take up the rods at the rear, the next time at the brake bands, etc.

## GOOD-BYE BACKACHE, KIDNEY AND BLADDER TROUBLES

For centuries all over the world GOLD MEDAL Bacterium Oil has afforded relief in thousands upon thousands of cases of lame back, lumbago, sciatica, rheumatism, gallstones, gravel, dropsy, liver, stomach, bladder and allied organs. It acts quickly. It does the work. It cures your kidneys, purifies the blood. It makes a new man, a new woman, of you. It frequently wards off attacks of the dread and fatal diseases of the kidneys, and often completely cures the distressing diseases of the organs of the body allied with the bladder and kidneys. Blood or cloudy urine, sediment, or "brickdust" indicate an unhealthy condition.

Do not delay a minute if your back aches or you are sore across the loins or have difficulty when urinating. Go to your druggist at once and get a

box of imported GOLD MEDAL Bacterium Oil Capsules. They are pleasant and easy to take. Each capsule contains about one dose of five drops. Take them just like you would any pill. Take a small swallow of water if you want to. They dissolve in the stomach, and the kidneys soak up all like a sponge does water. They thoroughly cleanse and wash out the bladder and kidneys and throw off the inflammation which is the cause of the trouble. They will quickly relieve those stiffened joints, that backache, rheumatism, lumbago, sciatica, gallstones, gravel, "brickdust," etc. They are as effective remedy for all diseases of the bladder, kidney, liver, stomach and allied organs. Your druggist will cheerfully refund your money if you are not satisfied after a few days' use. Accept only the pure, original GOLD MEDAL Bacterium Oil Capsules. None other genuine.—Adv.

## His Question.

"Will anyone ask me a question relative to any matter of life and death?" asked the thought reader.

"Well, mine refers to murder."

"Ah, I see blood!" exclaimed the thought reader, tragically. "You wish to know how to die the deed?"

"Yes, please."

"It was a relative."

"That's quite right. Father or mother's side?" ventured the inquirer.

"Father's."

"Wonderful. That, too, is correct. But what was the object?"

"Gain."

"How marvelous! Go on."

"Alas! I can see no more. Now, please read out my question, sir, for the benefit of the audience."

"Who killed Cuck Robin?"

## Catarhal Deafness Cannot Be Cured

Local applications are of no use. There is only one way to cure Catarhal Deafness and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this is inflamed you have a rumbling sound or imperfect hearing, and if the inflammation is not removed and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are cured by HALL'S CATARRH MEDICINE. It is a safe and effective remedy for any case of Catarhal Deafness that cannot be cured by local applications.

ONE HALL'S CATARRH MEDICINE. All druggists. Circulars free. J. J. Cheney & Co., Toledo, Ohio.

## Recognized.

Private Butler (former press agent, doing gentry duty)—Halt! Who goes there?

Private Leggett (former reporter)—Halt! Joe, could you slip me two on the sly for Jimmy here?

Private Butler—Pass, friend!—Buffalo Express.

## Cautious Kills Dandruff.

Another mark of dandruff with Cuticura. Follow at once by a hot shampoo with Cuticura Soap. If a man; next morning if a woman. For the scalp, use Cuticura. Do not use free samples unless you are sure you are not allergic. At druggists and by mail, Soap 25, Ointment 25 and 50.—Adv.

## Inconsistency.

"Did you ever notice," queried the almost philosopher, "that a man will stick his hand out to see if it's raining and then become peeved if he catches a drop on it?"

## The man who handles the truth recklessly is sure of a large crop when it comes to raising doubts.

## Heartburn, Belching, Indigestion, Food Repeating and Nearly All Kinds of Bodily Miseries

The first sign of stomach misery usually comes after over-eating. The doctors call it "sour stomach." The people say "sour stomach."

Millions of people who have lost their ambition, energy, courage, vitality and strength—who are weak, pale and listless—who go through life just dragging one foot after another—tired and worn out nearly all the time—nervous, irritable, subject to severe headaches, indigestion, and a long train of physical ills—would be surprised to learn that it is just an acid stomach that is causing them all their misery. Yet in nearly nine cases out of ten that is just where the trouble starts.

Now a sour, acid-stomach, or "supercidity," of course, simply means too much acid in the stomach. You can now quickly rid your stomach of its excess acid. A wonderful modern remedy called EATONIC literally wipes it out. It does the work easily,

quickly and thoroughly. It makes the stomach pure, fresh, cool and comfortable. The hyperacidity stomach of every misfortune! Food you eat and drink do get full of acid. You need food you cannot enjoy, eat, vigorous

EATONIC is in tablet form. It makes the stomach pure, fresh, cool and comfortable. The hyperacidity stomach of every misfortune! Food you eat and drink do get full of acid. You need food you cannot enjoy, eat, vigorous

AGRID STOMACH

As Age Advances the Liver Requires occasional slight stimulation.

**CARTER'S LITTLE LIVER PILLS**  
correct  
**CONSTIPATION**

Colorless or Pale Faces usually indicate the absence of iron in the blood. A condition which will be greatly helped by Carter's Iron Pills.
