All Kinds of Heating and Cook Stoves

Perfection Oil Heaters

Save the Nation's Coal

During the Cool Fall Weather there is nothing like the PERFECTION OIL HEATER for driving the chill out of the living room, den, bedroom, dining room or bathroom—day or night, and save your coal for the cold days of next winter. You will also find these compact little furnaces a great help in putting a little extra heat in the bathroom, or in fact, any room when the thermometer is down to 10 or 20 below and the furnace needs a little "boosting."

Perfection Oil Heaters burn kerosene—the ideal fuel. It's the one fuel which is easy to handle, safe, low priced and efficient (that is, it produces a great deal of heat at a low cost). Every heating unit of the kerosene is burned without waste. No smoke, no soot,

no ashes. They are light in weight, easy to carry from room to room, easy to operate and care for, and just what is needed in every home.
