Year of change

Continued from Page 8

inch wheelbase and are slimmer with smaller, lighter 302-cubic-inch engines.

While Chrysler has not decreased any of its model sizes appreciably, the company offers a number of changes under the hood.

The third-place auto firm has added its electronic spark advance system to the 360 and 440-inch V-8's and improved the performance of its 225-inch in-line six with a two-barrel carburetor.

Chrysler has also installed its lean burn engine system on four V-8 engine families for 1977. It is available on 11 models, and promises better fuel economy, acceleration and response. Plymouth Volare has a "super six" engine which is claimed to be 20 per cent more efficient than its 381 cubic inch

V-8 offered in '76.

The new look for AMC is its Pacer station wagon, which is four inches longer than the sedan and is 75 pounds heavier and holds twice as much cargo.

Aside from the Pacer wagon, AMC's biggest news is in its warranty. Buyer Protection Plan No. 2 extends the warranty coverage on the engine and drive train to two years or 24,000 miles. It also offers free or replacement repair of any defective part except tires for 12 months or 14,000 miles.

AMC will also provide free loaner cars if guaranteed repairs cannot be completed the same day.

In addition to the foreign cars on display, the 1977 Auto show will probably offer the most varied selection of any show in recent years.
