## Leisure Is To Enjoy

When a woman has been released from some of her household duties and there is time for other activities, why is there frustration? It's because many Americans still believe that work is what chiefly counts in our society. As time off from work and free time increases so does a woman's sense of guilt and uneasiness. Everyone has some freedom from work. But the thought of leisure time is frightening to many and they fear boredom. They make extra work for themselves instead of enjoying their newly found freedom.

Some women even work at their play. Many things they do have an emphasis on organization.
