There are many people who are donating the government a little every time they mail a letter to a party in their home town. They seem to think they have to use a three cent stamp on every letter, and the postal department is the gainer by hundreds of dollars by this misunderstanding. As a matter of fact a two-cent stamp is all that is required to carry a "drop" letter or one to a party whose postoffice address is the same as the office in which the letter is mailed.

The supper given last Friday evening in Masonic dining room by the ladies of the M. E. church was a success, both socially and financially. Spring flowers—hyacinths, daffodils and tulips—decorated the small tables around which many parties of friends gathered and enjoyed a social chat together, with the abundant satisfying and well served menu prepared by the ladies. Thanks are due to the Masons, who so kindly offered the use of their pleasant and commodious dining room and accessories, the Talbot greenhouse for the beautiful flowers, and to the public for its generous patronage.

## GREAT GUNS!—WHAT MAIL

Uncle Sam Will Carry a Whopping Load of Reading Matter About Victory Liberty Loan to His Prospects.

Two hundred and fifty tons of first class mail! That is the staggering weight of the matter which Uncle Sam will distribute throughout the Seventh federal reserve district in giving "scientific billing" to the Victory Liberty loan.

To insure maximum efficiency in the distribution of this enormous amount of propaganda material the distribution bureau of the department of publicity for the Seventh federal reserve district has evolved the following scheme, based on the most reliable figures obtainable. The estimated population of the district is 14,248,503 divided as follows:

Divisions	Popula- tion.	Per Cent of Total
Cook county, (Illinois)	2,883,481	21.3
Illinois (outside Cook county)	2,108,344	14.7
Indiana	2,230,402	15.2
Iowa	2,210,000	15.0
Michigan	2,744,400	20.0
Wisconsin	2,010,847	13.7
Total	14,248,503	100.0

The above districts are divided into counties, the county being the unit of distribution. There are 338 counties. Each has a chairman. He receives all the propaganda allotted to his district based on the proportionate population, and his own working organization set to it that all "big space" is properly billed. Here are a few facts regarding the whirlwind machinery of distribution:

Twenty thousand square feet of space are necessary for addressing and mailing room.

The distribution bureau has its own post office.

Three hundred men work day and night.

One million posters will be mailed in four-pound packages.

Eight million Victory Liberty loan buttons will be handed.

Two million circular letters to bondholders of previous Liberty loan issues will be mailed.

Five million letterheads and envelopes to bond salesmen will be distributed.

Tens of thousands of automobile owners will receive windshield stickers advertising "the loan."

It has been officially announced that the drive for the sale of Victory Liberty loan bonds will start on April 21.

If careful plans of the distribution bureau carry through every American on the morning of April 21, at least a week before the drive, will be greeted with the nation-wide injunction, "Finish the Job."

## CAPITALIZE YOURSELF

Helped On Your Stamps. Do not sell your War Savings Stamps. The government borrowed the money for a specific purpose. If the securities are sold, relatively your purchase will have been of no permanent benefit to the government. The men who buy and save, who follow the principles of thrift, are the people who will shape the destiny of the nation.

## Do Chickens Pay on the Average Farm?

It all depends on the farmer. If he looks on chickens as a nuisance, they don't pay. If he pays a little attention to them, they pay a big return for the effort.

There are two things to point to in making poultry raising a successful earlier hatches and more winter eggs.

How can a farmer get them?

First and foremost by having a substantial, air tight, warm, sunny, well ventilated Poultry House. And such a house quickly pays for itself with eggs bringing the prices they do now.

White Pine is the best wood for the outside of a poultry house. Because it stays where you put it without warping or shrinking or rotting. It's easy to work and easy on tools.

White Pine farm buildings are permanent. They last a lifetime, with practically no outlay for repairs.

Our service makes building easy and inexpensive. We have plans, specifications and bill of material for the Poultry House shown above—or for any type you may prefer. We will gladly give you an estimate of the cost.

Whatever your building plans, come in and talk them over with us.
