DIPPING CATTLE DESTROYS TICKS

Eradication of Parasites Brings Success to Dairying and Beef Production.

PETITION OF TEXAS COUNTY

Farmers Want to Receive Full Benefits by Cleaning Out Comparatively Few Blood Suckers Remaining in Community.

(Prepared by the United States Department of Agriculture.)

"Tick eradication has meant successful dairying and beef production for our community."

It is the policy of the United States department of agriculture not to hold under federal quarantine any counties or larger areas within the territory are infested by ticks, but after quarantine is removed it is necessary that the remaining ticks be cleaned out before the community will be free from danger of heavy reinfestation.

"We, the undersigned citizens of the Aldine community of Harris county, Tex., do hereby petition your honorable body to provide sufficient funds to complete the work of tick eradication in this county.

"The dipping of our cattle and cleaning of our ticks last year saved us many dollars both in increased milk supply and beef production. As just one concrete example, Mr. John Shannon, one of our citizens, was getting 10 gallons of milk from milking 38 dicky cows before he started dipping, and now he is getting 40 gallons of milk from 23 of the same cows. In

Animal Infested With Ticks.

short, tick eradication has meant successful dairying and beef production for our community, so we all, in one accord, hope that the few ticks that remain in the county may be cleaned up this season and that funds may be provided for this purpose."

The petition is signed by the Aldine Farmers' Co-operative association, through its president, C. A. Anderson, and its secretary, W. A. Tush, and by 14 other farmers.

USE SUNFLOWER FOR SILAGE

Under Dry-Land Conditions in Montana Crop Made Average Return of 1025 Tons An Acre.

(Prepared by the United States Department of Agriculture.)

Montana farm bureaus carried on numerous crop demonstrations last year and did notable work with tame sunflowers as a silage crop. Sunflowers under dry-land conditions made an average return of 1025 tons of silage an acre, and under irrigated conditions 29 tons an acre.

farm bureaus in Montana are the official organizations through which the state experiment station distributes pure and valuable seed which it has developed and increased. These organizations afford a reliable means whereby the experiment station can keep in touch with certain varieties of grain of proved worth. By working through the bureaus it is possible to secure an equitable distribution over the entire state.

CONTROL PESTS OF POULTRY

Vitality of Fowls Frequently Sapped by Mites and Lice, and Egg Production Decreased.

(Prepared by the United States Department of Agriculture.)

Mites and lice frequently sap the vitality of the fowl and prevent growth or lessen the egg production. Through cleaning of the house, regular applications of disinfectants to the roosts and nests, and a frequent dusting of the fowls will control these pests.

GRASSHOPPER ARMY CHECKED BY POISON

How New Jersey Farmer Stopped Infestation of Insects.

Dusted Line Across Field in Advance of Peas With Mixture of Air-Blacked Lime and Paris Green - Alfalfa Is Attacked.

(Prepared by the United States Department of Agriculture.)

Millions of grasshoppers infested the fields of Morris county, N. J., last August. George Flisk of Morristown had a fine second crop of clover and, adjoining it, a field recently seeded to alfalfa.

Stop Ravages of Grasshoppers.

The latter had germinated well and the young plants had made from one to two inches of growth. After the red clover was cut and made into hay, Flisk noted that the field had been infested by hordes of grasshoppers, which were moving on into the alfalfa and eating the fields bare of plants.

A number of newly seeded alfalfa fields on other farms were also attacked, but the grasshoppers were effectively checked by the poison belt recommended by the agent. The bait used was made up as follows:

One pound of white arsenic was mixed thoroughly in a bushel of sawdust, then 12 ounces of bait and one-half cupful of molasses were stirred into a gallon of water, and the solution was used to wet the sawdust. Such materials as bran and ground alfalfa hay can be used on the basis of the bait instead of sawdust.

"LET'S MAKE IT A MILLION"

Goal Set in Notice to County Agents and Leaders by the Department of Agriculture.

(Prepared by the United States Department of Agriculture.)

A million members is the goal set in the farm bureau of the 33 northern and western states is the goal set in a notice to county agent leaders and county agents by the United States department of agriculture. Report shows that in April 1919 there were 400,841 farm bureau members in these states, with 8,575 community committees—nearly a 30 per cent increase since the December, 1918, report, despite the influenza epidemic which handicapped membership campaigns.

"According to the 1910 census," says the notice to county agents, "there were 3,282,555 farms in the northern and western states. With one-third of the farms represented in the farm bureau they could be truly said to be fairly representative. Farmers should not be coerced or scared or fooled into the farm bureau. The organization is an appeal to their intelligence and their memberships should be solicited on a thoroughly dignified, common sense, business basis. Now is the time to make plans for the annual membership campaign for next fall and winter. Some of the states may wish to do this on a state-wide basis."

GARDEN ENEMIES WORK HARD

Gardener Must Make Continuous Fight Throughout Season—Cultivate at Short Periods.

(Prepared by the United States Department of Agriculture.)

The enemies of the garden begin work just as soon as the seeds are planted in the ground, and it is a continuous fight throughout the season. The gardener who hedges up his hoe and forgets his garden also hangs up his chance of victory. By far the best results can be procured where the garden is given frequent short periods of attention. Later in the season special care should be given to clearing away the remains of the crops and destroying any plants that are badly infested with diseases, or that harbor insects in any form.

"BAYER CROSS" ON GENUINE ASPIRIN

"Bayer Tablets of Aspirin" is of genuine must be marked with the safety "Bayer Cross." Always buy an unbroken Bayer package which contains proper directions to safely relieve Headache, Toothache, Rheumatism, Neuralgia, Colds and pain. Handy tin boxes of 12 tablets cost but a few cents at drug stores—larger packages also. "Aspirin" is the trade mark of Bayer Manufacturing, Monacacetic-acidester of Salicylicacid.

Generosity seldom lands a man in the poor house. No man or woman is ever good just for the fun of the thing. FARMERS ARE WORKING HARDER And using their feet more than ever before. For all these workers the frequent use of Allen's Foot-Ease, the antiseptic, healing powder to be rubbed in the shoes and sprinkled in the foot-bath, increases their efficiency and insures them physical comfort. It takes the friction from the shoe, freshens the feet, prevents chafing and blistered feet. Women everywhere are constant users of Allen's Foot-Ease. Don't get foot sore, get Allen's Foot-Ease. Sold by dealers everywhere.—Adv.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promise of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value must sell itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it. A prominent doctor says: "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitated to recommend for almost every case; it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver, and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism, etc. You may receive a sample bottle of Swamp-Root by Parcel Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents. Also mention this paper. Large and small medium size bottles for sale at all drug stores.—Adv.

There is no time to begin like the present.

Western Canada's "Horn of Plenty" Offers You Health & Wealth

Western Canada offers you the most fertile soil in the world—the same response to the world's needs. The soil is rich and the climate is ideal. The land is capable of yielding 20 to 45 bushels of wheat to the acre can be had on easy terms at from \$15 to \$30 per acre—good grazing land for stock raising. Many farms paid for from a single year's crop. Raising cattle, sheep and pigs brings big returns. The Government encourages farming and stock raising. Land Companies offer unusual inducements to Home Seekers. Farms may be stocked by mail order. Western Canada offers low taxation, good markets and abundant cheap labor. Write for particulars on the reduced railway rates of land. This is the best time to buy in Canada.
