To Clean your Castings
Brass castings may be cleaned in a moment by placing them into a solution of three parts sulphuric acid to three parts of nitric acid, to which after they have been mixed is added a quart of common salt. The whole being stirred until the salt has been dissolved. If this is placed in an earthenware vessel the brass castings can be dipped in it, removed, immediately, and placed in clear water. The castings can be made as bright as new by this method and there is little trouble involved.

Named From Saint's Day.
On the tenth of April, 1534, Jacques Cartier sailed from France with two small ships and 122 men to found a colony in North America. In May he arrived in the Gulf of St. Lawrence. Cartier entered the St. Lawrence river in the fateful day of St. Lawrence, and called the gulf St. Lawrence in honor of the patron saint of that day.

Keep Sweet.
Loosing temper takes all the sweet out of life. One may get up in the morning with a clean heart, full of song, and start out as happy as a bird, and the moment he is annoyed and gives way to his temper of clean feeling vanishes; and a load as heavy as lead is rolled upon the heart. Be the master of your temper, and you hold the key to joy and contentment.

Triumph Over Necessity.
Manhood begins when we have in any way made true with Necessity; begins even when we have surrendered to Necessity, as the most part only do; but begins joyfully and hopefully only when we have reconciled ourselves to Necessity; and thus in reality triumphed over it, and felt that in Necessity we are free—Carlyle (Essays).

Invent a First Chronometer.
The first chronometer of any value was the invention of John Harrison about 1750 for which he received from the British Board of Longitude \$50,000 as a part of \$100,000 which "they" offered for many years as a reward for a thoroughly trustworthy timekeeper.

Catacombs of St. Louis.
St. Louis has catacombs like those at Paris. The midday of city for brick and other products has left many chambers and tunnels beneath the outlying districts, and the quarrying of stone for building purposes, long ago has "undiscovered" certain European cities.
