Renown Underfeed

Like many people, we were at first skeptical of this new method stove.

But, when in our own use we found that one of them gave more heat with less fuel than a heater of a famous, make nearly twice its size, we were convinced that we had found a heater that these times of coal scarcity and high prices demand.

This wonderful Renown Underfeed burns at a steady heat, putting in fresh coal does not deaden the fire.

It consuming all the gas, soot and smoke, getting every particle of heat out of the fuel, leaving an ash as fine as powder and does not clog up the stove pipe or chimney flues.

You need empty the ash pan only twice a week and with it you can burn soft coal as cleanly as hard.

No smoke escapes into the room. It burns all kinds of fuel and it will soon pay for itself in the fuel it saves. The price is very reasonable.
