## Which is the Best Phonograph?

You don't need to go to a store. Just look the different ads over. Some makers praise their Phonograph's horn, show their reproducers, others their cabinet work, some their low prices, etc., etc. There is only one maker who advertises that his phonograph will Re-Create music exactly like the original and that maker is THOMAS A. EDISON and his recently discovered phonograph is called

## The New Edison

Not only does he advertise it, but the tone tests to prove it are being held in Detroit and all over the country where artists sing with their own records on the New Edison, and critical audiences are unable to detect any difference. And yet you will discuss the question, "Which is the best Phonograph?"

## Perfection

What more can you ask of a Phonograph than that it Re-Create music perfectly. No other Phonograph maker dare even make this claim. What is there left to discuss. Nothing.
