MEET BORIS THE TALKING CHESS COMPUTER

BORIS is the world's most advanced portable chess computer. He's programmed for ALL classic chess moves, plays black or white, even himself. He'll even teach you how to play chess and suggest the moves for you when you're unsure of what to do next.

BORIS will flash different messages during each game to keep you on your toes, and he won't let you make an illegal move either (no Cheating). You can set him to play at a beginner's level or let him loose, and he'll keep the attention of a Master. A special feature lets you set up any board position in seconds for practice, or remove pieces for handicapping. BORIS comes in a hand-crafted, solid walnut case, 10"x3 1/4"x6 1/4" with chess pieces and board.
