Back before history began, man discovered that he could provide himself with utensils for cooking, and carrying water, storing meal and grain by shaping river clay into vessels and firing them in his cook fire. As civilization progressed, he found flat pottery, saucers, plates and other items of dinnerware appear in earliest Egyptian and Greek artifacts. These were also present in the early Chinese and Japanese civilizations. The art of glazing and decorating pottery was highly developed several hundred years before the birth of Christ, but it was not until about 1700 A.D. that a French Jesuit missionary in China discovered a strange white pottery clay which he called Chinoclay. He sent samples of it back to France where the first experiments were tried in making white porcelain china in Europe.

During the past 250 years, both European and American artisans have perfected the glazing and firing process which give to the magnificent porcelain china which we have today.

Here at Orin's we have so many beautiful patterns in both Domestic and Imported china. You will enjoy every minute of your inspection and the selection of your own pattern to cherish and use always.
