"They are headed for the altar" In the earlier centuries of matrimony, May was the most popular month for wedding. It was a time when the weather was just what the doctor ordered. It was a time when the flowers were in bloom and the birds were singing. It was a time when the sun was shining and the wind was soft. It was a time when the world was full of love and joy. It was a time when the heart was full and the soul was free. It was a time when the future was bright and the past was forgotten. It was a time when the world was at its best and the people were at their finest. It was a time when the love was true and the marriage was strong. It was a time when the happiness was everlasting and the joy was unending. It was a time when the world was a better place and the people were a better people. It was a time when the future was bright and the past was forgotten. It was a time when the love was true and the marriage was strong. It was a time when the happiness was everlasting and the joy was unending. It was a time when the world was a better place and the people were a better people.

As late as 1559 Philip II of Spain was married at the church door of Notre Dame by the Bishop of Paris.

However, the determination of the church to enhance all human relationships with spiritual meaning made its influence felt in the marriage ceremony. The Prayer Book of Edward VI (1549) decreed that the marriage rite should take place within the sacred atmosphere and be performed by a priest. Today, all of us consider marriage a sacred relationship.
