Some people feel they owe so much to themselves they never pay anybody else.—Cartoons Magazine.

Security of the Nation.

Colored Diamonds Rare.
Green diamonds are found, and others of crimson, but these are rare. Black diamonds are common enough but black pearls are rare. Pink pearls are greatly prized. One of the finest in existence was found in a fresh water mussel in the Mississippi river, and is valued at \$15,000. On the Pearl Islands, south of Panama, pearls are found which are lead gray.

No other phonograph can do it!

No other phonograph even dared the test which the New Edison underwent December 25th before a large audience in the Town Hall.

heard the living voice and the RE-CREATED voice brought into direct comparison. You know that there was no difference between the two voices.

That fact is something for you to think about.

A similar test was made by Vera Barstow with RE-CREATIONS of her violin selections. Again the same astonishing result—there was no difference between the living performance and the RE-CREATED performance.

The test of comparison with living artists is the only phonograph test which means anything. It is the only way in which a phonograph can irrefutably prove its realism. To sustain it, requires absolutely perfect realism,—nothing less.

By this wonderful performance, the New Edison has placed itself apart from all other phonographs and talking machines. It alone has sustained this drastic test. It alone has proved concretely and conclusively, that it gives you the living performance of great artists.

On December 25th, the New Edison stood by Amy Ellerman's side in the Town Hall. If you were there you

Hooded Seal.
The hooded seal for many years was hunted along the Atlantic coast for its oil, and fishermen insisted it shed tears when surprised and caught, and had a large cartilage hood that could be quickly thrown out to cover and protect its head.
