Third Lecture in Series at
Universalist Church

Dr. Beresford will deliver the third lecture in the present course being given at the Universalist church, "Saunders with Shakespeare on the Waysides of Life." A most coveted pleasure is to have a few moments—in familiar and friendly chat—with great souls. The myriad-minded Shakespeare as he presents the many-colored and many-textured life of ours, said many things about the trifles that make up the sum of life. Dr. Beresford has gathered these together and will present them in this lecture.

These way-side chats of the great bard deal with some of the ever out-standing hopes and problems of our life—and what this master of human lore has said cannot but be of interest to us all.

FARMINGTON WOMAN HAS
VALUABLE LAND IN
KANSAS

Mrs. Claude Leach of this village is in receipt of word that some land she owns in Kansas is valuable in the form of oil bearing possibilities. Mr. Walter McGinness, Jr., was in the village recently and secured for the lease of the land from Mrs. Leach for the sum of \$3,000 and an eighth royalty if oil is struck on this property. The property is forty acres in extent, and it is only recently that oil has been discovered around the land and oil wells will be sunk as soon as possible. The property is at Eldorado, Kansas.

Aristotle in Error.

Before anything was known about
the laws of gravitation, it was com-
monly believed, on the authority of
Aristotle, that every body had a "nat-
ural" place, and that its normal state
was one of rest in that place. Thus
a stone was supposed to sink in water
because its natural place was at the
bottom of the water.
