Many ambitious men and women live only half a lifeand don't know it

No person whose nerves are continually irritated, whose appetite and digestion are disturbed, or who doesn't sleep well has more than half his normal chance for success in life. For weakness, debility, anemia and general lack of tone are a serious handicap to anybody.

Those who drink tea or coffee are often suf-ferers from these conditions. Tea and coffee contain caffeine, a substance which has a decided stimulant action on the nerves and brain cells.

Each cup of strong coffee contains about as large a dose of caffeine as your doctor would ordinarily give to a very sick person.

You can readily see that the effect of giving this stimulant regularly to a well person might finally have a tendency to make him sick.

If you want to avoid a very common cause of irritation and enjoy restful sleep, good digestion, and all the feeling of vigor and robust endurance that comes to healthy, normal people, quit tea and coffee, and drink Postum, instead. It is a rich, coffee-like cereal beverage—perfectly deliciousl
