

What Really Counts

It is not what you spend, that's sure. Men have spent fortunes and have finished much worse off than when they started. Here is the answer. It is the amount you SAVE that counts.

Therefore, decide how much you intend to save. Then each month, each week, each day, deduct the sum from what you make and deposit it in our bank. Spend the rest if you care to or need to, for you are still on the safe side and making progress. We will safeguard your savings.

Costs Money to Keep Mites Dry. One of the big expenses of a coal mine is the constant pumping of water to keep it dry. In the average anthracite mine, 18 tons of water are hoisted from the mine for every ton of coal mined, and in some mines it runs up to 27 tons.

Worthy Ideal: When I die, call me "a good sport." A sport in all that it implies: cheerful, willing, ready to serve; anxious to do right; never content when the day is done—impatient for the new chance on the morrow—defeated.
