

Proper Treatment

Scrap iron is worth about \$50 a ton. Main-spring steel for watches is worth about \$22,000 a ton. Both are made from the same kind of ore. What makes the difference in price?

It's the TREATMENT the metal receives, that's all. The dollars your handle idly, spend foolishly, invest carelessly, are worth but little to you in the long run. The dollars you save and carefully invest, increase in value and lay the foundation for a fortune. The dollars in each case are the same. It's the TREATMENT they receive that makes the difference. See the point?

FRANK DIXON TO LECTURE HERE

Eminent Publicist at Coming Redpath Chautauqua.

Will Deliver Great Lecture on "The Indispensable Tools of Democracy."

"The Indispensable Tools of Democracy" is announced as the lecture subject of Frank Dixon, lecturer and publicist, who will be heard at the coming Redpath Chautauqua. Mr. Dixon is nationally known as a powerful Chautauqua lecturer. For nearly

FRANK DIXON

twenty years he has spoken every state in audiences in practically every state in the Union.

Frank Dixon, as an interpreter of the rapidly changing currents of moral and social forces, has been well described as "keen, caustic, courageous, logical, brilliant—a general hurrying out fact after fact into 'battle formation'."

"The Indispensable Tools of Democracy" promises to be one of the most important of the Chautauqua lectures.

Terrifying Visions of Dreams. Dreams of death, ruin or water are often signs of irritation of the mucous membranes, and the dreamer should not be surprised to wake up with a sore throat. Should you dream of people severing their own necks, it is an infallible sign that the liver is affected; while it has been noticed that when the dreams are of pain in any particular part of the body there is something wrong with that part.

Heavy Loads Caused by Fuel. The annual loss caused by forest fires is enormous, but it is no greater than that attributable to fuel, which not only timber, but also timbers, telegraph poles and other structures of wood, necessitating their replacement. The "life" of the average railway tie is seven and a half years; if fuel would let it alone it would last twice that long.

World's Finest Diamonds. The following is a list of the most famous diamonds of the world: (1) the Hraapana, (2) the Cullinan, (3) the Florentine, (4) the Great Mogul, (5) the Hope, (6) the Koh-i-noor, (7) the Nassau, (8) the Grail, (9) the Pigott, (10) the Pitt or Regent, (11) the Sancy, (12) the Shah, (13) the Star of the South.

Chemical Knowledge Spreads. More and more it is coming to be known that the chemical elements are made up of identically the same stuff, and that they differ only in their structural arrangements. More and more the passage from one element to another which has so long been a thing of the past, is now being observed taking place spontaneously in a matter of course and so nothing which we may ultimately hope to control.

Give Ways to Help. Nerve is with incessant affirmatives. Don't waste yourself in rejection, nor bark against the bad, but chant the beauty of the good. When that is spoken which has a right to be spoken, the chatter and the criticism will stop. Set down nothing that will not help somebody.—Emerson.

More Battery Care—More Battery Life

Remember the old shoes you left out on the back porch—how they got stiff, misshapen and useless.

It's like that with a battery. If you neglect it, you'll find that you've left the way open for a whole flock of troubles that shorten battery life.

Your battery doesn't need much attention, but it needs a little—and that regularly. The safe way is to let us care for it according to Willard Standards of Service.

Never mind the make. We look after all of 'em!

Is This Encouraging Ideality? Spending of experts to the East, there is a very English firm which, in the course of its ordinary business, produces large quantities of waste spelter and lead. This material is melted up, run into molds and exported in the form of images of various eastern gods.

Seeing the Brighter Side. Persistent endeavor to look on the brighter side of things will soon destroy the habit of magnifying the evils of life. What is more to the point, it will aid us in combating evil more successfully, thus destroying the fear that the world is going to the devil.
