Junior Red Cross Spreads Good Will Throughout World

Nearly 5,000,000 pupils in the schools of America are following the standard of unselfish service as members of the American Junior Red Cross, the annual report of the American Red Cross discloses. This gallant host is represented in 125,074 school rooms of 24,239 schools throughout the United States. With a service program that is local, national and international in scope, the American Junior Red Cross is working unflinchingly for health and happiness and in the promotion of activities among boys and girls wherever there is opportunity for usefulness.

Increased activity on the part of the schools enrolled and deeper recognition by school authorities of the educational values of Junior Red Cross have been significant features of the last year. Carrying on educational and relief work in France, Poland, Austria, Hungary, Yugoslavia, Albania, Bulgaria and Rumania, the American Juniors have influenced the forming of Junior departments in the Red Cross organizations of these countries. American boys and girls wearing the "I Serve" button of the Juniors are proving apt messengers of the spirit of good will and mutual understanding through correspondence with pupils in schools scattered throughout the world. At the close of the school year in June 2,009 schools were engaged in correspondence with a like number of schools in Europe; 254 schools in our insular possessions and Alaska territory carried on an exchange of letters with schools in the United States and South Africa. In fact, nearly 2,700 schools with probably 100,000 pupils were brought into this fine act of cheerful communication, while 3,347 articles passed through National Headquarters of the Red Cross in exchanges between the interested pupils here and overseas.

An incident of the year's advance was the beginning of activity which will eventually install Junior Red Cross in the Indian schools of the United States. From every section of the country reports of the tour of the unit of crippled children with their chorus which came from the Bakule school in Prague, Czechoslovakia, to show gratitude to the American Juniors for their assistance declare that nothing since the World War has done so much to awaken the Red Cross spirit in the communities visited by the unit.

The work of the American Juniors in foreign fields is emphasized in the advancement of playgrounds, scholarships in farm, trade and other schools, community and school garden work, and donations of cash and equipment to children's organizations. In these projects \$112,460.17 was spent during the last year in ten European countries, in China and in the Virgin Islands.

"It is inconceivable that the Red Cross could have come thus far only to retreat; that it could have succeeded up to the present time only to fail."—President Coolidge.

Liberal to Ex-Servicemen
Over \$1,000 was expended by each of the 1,000 American Red Cross chapters in the past year in behalf of the allied ex-servicemen. The actual amount spent was \$2,000,000.

LEARNING SOMETHING

His Wife—Here's the plumber's bill for that little job. What do you think of it?
Dr. Grabbitz—I think, my dear, that in the medical profession the art of making charges is still in its infancy.

Good Old Wall!
Scratch, scratch, scratch!
The sound made by Convict 401 was barely audible, so carefully did he work. The stone wall of his cell was hard and resisting, but the blade was stout, and persistence might finally turn the trick.
Scratch, scratch, scratch!
He had been sent up for polygamy. By a strange coincidence all four of his wives had been large physically, with red hair—yes, sir, all four of them—and tempers to match.
Scratch, scratch, scratch!
Night after night he had worked away; suddenly he stopped with a low cry of triumph. He was convinced.
"Good old wall!" he muttered. "It stands the test. They can't get at me."—Exchange.

New Aerial Flyers.
An Ohio aeronautical engineer, it is said, has built a "bicycle-plane," weighing less than 100 pounds and operated by foot power, which has flown successfully at McCook field, Dayton. Even more remarkable is a little-like glider, constructed in Europe. Although weighing only ten pounds and capable of being folded up and carried on the back, this airship is said to have remained in the air for almost an hour on several occasions.—Popular Science Monthly.

TENNYSON RUDE TO GWESY

Invited One of His Admirers to Luncheon and Then Refused to Talk to Her.

Tennyson gained a reputation in his later years for rudeness. It was due perhaps to his dislike of intrusions upon his solitude. When the mood was upon him he was apt to disregard entirely the conventionalities.
A neighbor of the poet laureate once asked if he might bring to Alldworth a woman who was visiting in his home. She was well known in society. It was carefully explained to Tennyson that the woman had a great admiration for the poet's works and desired very much to see him. Tennyson assented quite readily, telling the neighbor to bring her to luncheon and named the day. When the day arrived the poet had forgotten all about it and, as it chanced, was in one of his solitary moods.
The woman was introduced; Tennyson bowed. Luncheon was announced and they went to the table next her host, who throughout the meal did not utter a word. At the end of it he retired in silence to his own room and the woman left the house, to which she had made her pilgrimage in hope and reverence, not having been so much as the sound of the poet's voice.—Kansas City Star.

Childish Philosophy.
A little girl aged six was asked to state the difference between pride and vanity. After considerable thought she replied: "Pride means, I don't think much of you; vanity means, 'What do you think of me.'—Boston Transcript.

LOCAL NEWS.

Mr. and Mrs. Mark Bachelor were Pontiac business callers Saturday.

Mrs. G. Lee Anglim spent Wednesday afternoon in Detroit with friends.

When You Build or Remodel

YOUR satisfaction with the finished work, whether new construction, repairing or remodeling, will depend entirely upon the grade of materials used.

We recommend Sheetrock, the fireproof wallboard, for walls and ceilings. It is gypsum plaster in broad ceiling high sheets always 3/4 of an inch thick.

Our policy is to handle only the highest grade, carefully selected lumber and building materials. When we furnish the materials for the job, you are assured full value for your money.

Sheetrock will not burn, swell, warp, shrink or crack. It is the only wallboard that can be successfully wall papered without using panel strips.

US SHEETROCK The FIREPROOF WALLBOARD

Call and let us figure with you for any building, repair or remodel work. We want you to get acquainted with our facilities
