ORIGIN OF THANKSGIVING DAY.

Thanksgiving Day has long been celebrated the first really American holiday. President Lincoln established it as a national festival in 1863, and since that time it has been a legal holiday.

Bradford, in 1633, called on the forty-five surviving passengers of the "Mayflower" to hold a feast of gladness and thankfulness. He also followed the proclamation of Moses to the letter, for he asked ninety and nine strangers, among them the good Indian, Massasoit, and others belonging to his famous tribe.

Six years after Lincoln issued his Thanksgiving Day edict nine Southern states adopted the holiday. In 1877 a general Thanksgiving Day was proclaimed in Scotland. It comes in the middle of November.

Record Wheat Yield. What is said to be Ohio's record wheat yield was made this year by Charles Karns, a Miami county farmer, who produced 527 bushels of wheat on ten acres, an average of nearly 53 bushels an acre.

Well thats where luck hits you and I dont think I shall try service any more do they want any more girls in the factory at fifteen per?"

A Matter of Time. Chancellor Brown of New York university was talking at a luncheon about the French occupation of the Ruhr.

"Well, certainly," he said, "Germany has been taking her time in paying up. She has been taking her time meticulously. It reminds me of a story of an arrival in a jail was having his first constitutional in the jail yard when he heard a hoarse whisper behind him: 'How long ye in for, mate?'"

"A letter was thrust into his hand and the voice from behind said hurriedly: 'You're in for life. Mail that for me when you get out.'"

VITAMINES NEEDED BY FISH

Fresh Water Shrimp/Diet McKie Gray. King Trout Extremely Lively in Montana Stream.

Fish to become gentry require vitamins the same as human beings do to have pep. This has just been demonstrated by hatchery officials in the course of their United States government fish ten-year program of experimental work in stocking the glacial-fed lakes of Glacier National park with the principal species of trout.

Up to date 3,000 brook, black-spotted, rainbow, cutthroat, Dolly Varden and grayling, varieties have been planted in a hundred streams and lakes of the Montana wonderland. Nature seemed to provide a well-balanced diet for all except the grayling, to the disappointment of Uncle Sam's fish experts. They did not propagate properly. They got sluggish and kept dying off until the fish dietists discovered that their diet was something lacking in the natural food of the grayling.

TRAIL'S END

I used to think old age a desert land. A place of broken dreams and faint desires. Of vanished friendships and of lonely days. The banked gray ashes of life's early days. But now, as slightly down my footsteps in that valley which they say is drear, I find the banks are blue with violets, and all the springing birches are singing here.

I used to think my heart would be so sad. To spill its tears to see another smile. But I am still a child of laughter. Gay as the friend who walks with me my friend. I hear songs as soft as the dawn. That all love's messengers around me sing. So walk serenely in a pleasant path. Fall in the gentle replica of spring. —Christian Herald.

Forecasting Weather. When the mercury falls suddenly in hot weather, look out for thunder or high winds. In frosty weather a thaw is foretold. When the weather is already wet and the mercury continues to descend, more rain can be expected. During winter, if the movement of the mercury is unsettled with sudden rises and falls, unsettled weather conditions are likely to prevail.

Superstition Concerning Moon. Why is it considered unlucky to see the new moon through glass? Moon worship is one of the oldest forms of religion, and the new moon—the symbol of reviving life—was so sacred that white tribes would assemble waiting for it to appear. Anyone who saw it through glass must have been indoors, and therefore absent from the sacred ceremony of welcome.
