YOUR SHOW-WINDOWS

The purpose of the show window is to attract new customers and make the business grow. A well-lighted window calls out to the passersby to stop, look, and be favorably impressed.

A dry goods store reports a test in which it was found, by actual count, that the number of passers-by stopped by its show-windows increased from 34 to 65 per cent when better lighting was put in. The effect on sales was equally gratifying.

Are your windows profitably lighted? Or, are potential customers walking indifferently past and stopping at the better illuminated display of a competitor? Have one of our illuminating engineers inspect your lighting. No charge for this service.
