

Off into wild blue yonder

I hugged her and we smiled a goodbye in the local Air Force recruiting office long before dawn on one of winter's coldest morn-ings last week. I turned around as I left and caught a glimpse of her yellow ski facket as she began a conversation with her recruiter. Funny, but I found myself remembering the yellow dress she wore as she walked down the hill on her way to her first day of kindergarten. I worried a lot that day, I remember, that my "baby" would have a hard time adjusting to the rigors of school regimentation. This time I felt a lot more sure of her ability to cope with a lot more rigors.

rigors. Fifteen years can make quite a difference, and anyway we've all survived many comings and goings in the meantime.

survived many comings and goings in the meantime. WE'VES SEEN her sisters take off for college and come back and take off again to pursue dreams in far parts of the country. We've seen one walk down the aisle into matrimony and have begun preparations for another such trip. We've changed houses and traveled around the country and both our generations have seen friends move far off. So when our youngest announced a few months ago she was considering a four-year enlishtment in the service, we knew it would be another big change, but one that sounded like agool idea. She was interested in the training she could get. We thought that in her case it was the right way to get the training. We all were even more pleased when, a few weeks after the swearing in, we learned she was being assigned to medical techni-cian training. We voiced often our eny that he was heading to traas sun. That should make even basic training bearable.

IN THE EARLY days of 1981 she quit her job and prepared to

IN THE EARLY and a second seco

ed one night. There were severe withdrawal symptoms when she sold her car. "Withdrawing into your car," quipped a friend who gave me a lift one evening when I loaned mine out. She sorted belongings and even cleaned her room. Well, sort of cleaned her room. The family prepared a CARE package for a farewell dinner. We included a supply of toy cars and some wings (chicken) and memorabilia of home like Mom's much-ridiculer locks and shells.

memorabilia of home like Mom's much-ridiculed rocks and shells. Our airman finot even airperson) enjoyed a few parties and a day of skiing with a favorite friend and a couple of evening times by the fire with her dad and me. And then the alarm went off on the appointed day and we all had to believe she was doing this. The recruiter had recommended that families not go to the air-port with the new enlisters, so we didn't see her off into the wild blue yonder. But finally this week a card arrived and we know she's on base and keeping well occupied. We're looking forward to hearing more. It should be an interest-ing four years.
