Spring ahead with great makeup

It's all in the detail. . . . PALE COLORS making a splash. Fresh new makeup will add glow this season are pearly grey, pale to spring and summer faces if it's shrimp, pale gold, the palest okra, clean and blended. There won't any the most faded aqua blue. . . worn lines of demarcation between with a neutral shadow or liner like makeup colors. The pop of makeup brown or grey.

For the best look, opt for a mono-tone face, with shades of one color one eyes, lips and cheeks. Foundation should be sheer or give the illusion of sheeress.

The new emphasis on the eye-brows shows shimmering golds and bronzes placed on the lids, then brought up and worked into the brows.

For the eyes, use new paled-out colors in shadows and liners. . . always blended and blurred to a pale, pale softness.

If dark colors are your fancy, use brown, blue, green or purple.

For day, it's soft, sand-colored eyes. At night, add shimmer with silvers and deeper, more intense colors blended well.

Lips are the season's focal point and they boast richer depth of color with shimmer added. Forget lip liners; instead, achieve a depth of color from blending several shades of one watery colors or dark, muted smoky color.

Hottest lip colors are richer golds, orangy tones to terra cotta, as well as apricots and hibiscus colors.
