

Signs of spring

The wind was blustering and winter tightening its hold when Observer & Eccentric photographer Bill Bresler was asked to get onto film some signs of spring.

Sure, he said, he thought he could find some.

And he did, and here they are. Not seasonal, you say? Not the way you think spring should look?

Well, look up, then, to the date at the top of this page. And see if you don't agree that the first day of April is the one to "spring" some pictures like these.

Happy April, no fooling. And happy springing too.
