

reach the bottom foliage.

But one good trimming is not enough for the young hedge. Trim it back every two months during the growing season. Always prune one-half of the new growth each time you trim.

Follow these pruning rules for the first two years. For the first year, don't worry about achieving the hedge height you want

but prune properly to get a hedge which is think with no gaps before you let it grow to the desired height.

Don't be timid with pruning plants used as hedges flourish with heavy pruning. If you want advice on which plant to buy or how to care for them, your local nursery can give you sound advice.

**SNAPPER HI-VAC RIDER
THE LAWN GROOM.**

The SNAPPER Hi-Vac* rider makes precision lawn care a snap. In the patented Hi-Vac system, the contoured blade spins in a deep formed deck to create a powerful vacuum. Grass is set up for a smooth, even groom. Clippings and debris are blown into the optional rear-mounted grass catcher.

High-Vac riders can also use SNAPPER's exclusive Thatcherizer

attachment to clear the lawn bed of harmful dead and decaying material. The Hi-Vac rider vacuums loosened thatch right into the grass catcher.

Other economical options like the Bag-N-Wagon, dozer blade, give SNAPPER Hi-Vac rider four season versatility.
