Cancer is curable.
The fear of cancer is often fatal.

If you're afraid of cancer, you're not alone. But some people are so afraid that they won't go to the doctor when they suspect something's wrong. They're afraid the doctor might "find something." This kind of fear can prevent them from discovering cancer in the early stages when it is most often curable. These people run the risk of letting cancer scare them to death.
